

BATHULA CHIRANJEEVI

+91 9347631068 | chiranjeevibathula06@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Computer Science undergraduate with strong foundations in software development, data structures, and full-stack web technologies. Skilled in building web applications, AI-powered assistants, RAG systems, automation workflows, and SaaS products using modern technologies. Passionate about solving real-world problems through clean code, practical AI solutions, and continuous learning.

Education

B.Tech in Computer Science and Engineering

2023 – 2027

JNTUA College of Engineering, Anantapur

CGPA: 9.18/10

Intermediate – Mathematics, Physics and Chemistry

2021 – 2023

Sri Vikas Junior College, Vinjamur

Percentage: 98%

Technical Skills

Languages: Python, Java, C, JavaScript, TypeScript

Full Stack: React.js, Next.js, Node.js, PHP, HTML5, CSS3, Tailwind CSS

AI/GenAI: OpenAI API, Prompt Engineering, RAG, AI Agents, Embeddings, Semantic Search

Databases: MySQL, PostgreSQL, Supabase, Qdrant

Tools: Git, GitHub, VS Code, Vercel, n8n, Gmail API, Telegram Bot API

Core Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Problem Solving

Experience

AI Automation & GenAI Intern

May 2026 – Present

DeepDrishti.ai

- Building AI automation workflows, RAG systems, and AI assistants using n8n, OpenAI API, embeddings, semantic search, and vector databases.
- Developing full-stack AI applications using Next.js, React, TypeScript, Supabase, PostgreSQL, and protected API routes.
- Working on document search, website knowledge assistants, AI email workflows, chatbot automation, and business automation use cases.
- Contributing to AI Prior-Art Discovery Engine with semantic patent search, similarity detection, novelty scoring, and claim overlap analysis.

Projects

AI Startup Launchpad | Next.js, TypeScript, Supabase, PostgreSQL, OpenAI API

GitHub | Live Demo

- Built a GenAI SaaS platform that helps founders generate structured startup plans using AI.
- Added authentication, project management, AI plan generation, generation history, and user-specific data storage.

RAG-Based AI Knowledge Assistant | n8n, OpenAI API, RAG, Vector Database

GitHub

- Built a document-based AI assistant that answers questions from uploaded PDF documents.
- Used PDF extraction, embeddings, semantic search, vector storage, and context-based response generation.

Website RAG Chatbot | n8n, OpenAI API, Qdrant, JavaScript

GitHub

- Created an AI chatbot that answers questions from website content using RAG architecture.
- Implemented website crawling, OpenAI embeddings, Qdrant vector storage, and grounded AI responses.

Leave Management System | PHP, MySQL, JavaScript, PHPMailer

GitHub | Live Demo

- Developed a leave request and approval platform with role-based access control, OTP authentication, and email notifications.
- Designed an admin dashboard for managing employee requests, approvals, and leave records efficiently.

Municipal Community Complaint System | PHP, MySQL, JavaScript

GitHub | Live Demo

- Developed a complaint management platform enabling citizens to report, track, and manage community issues online.
- Implemented complaint categorization, status tracking, and an admin dashboard for efficient issue resolution.

Achievements & Certifications

- Merit Scholarship recipient for securing 2nd rank among all branches in B.Tech II Year.
- Natural Language Processing – NPTEL, IIT Kharagpur.
- Introduction to Prompt Engineering – IBM.
- Problem Solving Basic and Intermediate – HackerRank.
- Cybersecurity and Cryptography – Infosys Springboard.
- GATE Set Go – CSE / DA – GeeksforGeeks.
